

SECTOR

eTicket and eCollision Common Fields

Version 1.6

Washington State Department of Transportation

August 2, 2005

Disclaimer

The contents of this document are current as of the date shown. Efforts are currently underway to re-design the officer and citizen collision report forms. This may result in some existing data fields being revised, or new data fields being added.

Any software that creates an electronic ticket record and an electronic collision record must ensure that data contained in the common fields listed in this document is shared between the two records in order for that collision record to be accepted by the Washington State Department of Transportation for inclusion into the Collision Location and Analysis System (CLAS).

For further information on this subject, contact:
